

Opinion statement cards

Cut out each individual box to create a set of opinion statement cards. Give small groups of students one of the cards to research using a fact-checking website.

Solar panels are a waste of money for homeowners.

Wind energy is too noisy and bothersome for nearby residents.

Renewable energy will never meet our energy needs.

Electric vehicles are not practical for everyday use.

Hydropower is harmful to the environment.

Transitioning to clean energy will cost too much money.
