1. Materials extraction (cutting down the trees for the wood and drilling the oil for the lead colour) 5. Disposal

5. Disposal (when the pencil is no longer wanted or is too short to use it needs to be disposed of)

2. Processing and production
(turning the wood
into the pencil
and processing the
graphite to make the 'lead')

3. Transportation
and purchase
(the pencil is transported
to the shops where
it can be bought
by a consumer)

(the pencil is used to write many words and create many doodles)

4. Use
