

# Fishing Worksheet

Follow these instructions to work out if your fish is a good fish or a great fish:

1. Catch a fish from the class bucket.
2. Use the picture to find out: What type of fish do you have?
3. Measure how big the fish is. Put the fish head at the top of the ruler, and measure it all the way down to the tail. What number is at the fish's tail?
4. How many fish of this type have I already caught?
5. Do I keep the fish or do I return it to the sea?

What does it look like?	What type of fish is it?	How big is the fish?	How many can I take?	How many have I already caught?	Can I keep it or should I put it back?
	Salmon		4		
	Tuna		3		
	Shark		2		
	Orange roughy		0		
	Snapper		4
