

Names: _____

Sources of Energy

We are investigating _____

This is a type of renewable/^{circle one}non-renewable energy because...

In the box below, draw a diagram and include annotations to explain how this process provides energy.

In the table below, list the different resources required, where they are sourced, and the impacts of this for each stage of the production life cycle.

	Physical Resources	Human Resources	Economic Resources	Political Resources
Start Up				
Ongoing				
End of Life				

Looking at the table above, consider which of these impacts are local (circle in green), national (circle in yellow), and global (circle in red).
